

## Design and Technology at Chaucer School

### The Department

Students at Chaucer School love DT lessons. They enjoy working together to create new products, to work with a range of materials and to share their thoughts and ideas with each other. The department promotes the growth of creativity, individuality and resilience.

The department is housed in six rooms (workshops and food technology classrooms) located together all of which have interactive whiteboards. We also have our own dedicated ICT suite in which all students get to experience high quality DT/CAD lessons.

The department works hard to give all the students at Chaucer the best opportunity to develop their technology skills and succeed in the subject. Staff work together to plan and resource the curriculum and to introduce and evaluate different ways of working in the classroom.

The department is very supportive and forward thinking and values staff development highly. We are committed to developing all of our members of staff and you can look forward to becoming part of a hardworking, friendly and dedicated team.
